

## Energy tour

### Energy resting place north-east - Ecopark Hartberg

Visit with us the most north east energy resting place of that altogether 13 energy resting places of Energy Road. At these places one thing is shown exemplarily, how energy can be generated from nature, without endangering thereby resources or the environment. The operators of these sites united to a working group ("ARGE Energy Road"). All together they want to emphasize interested people to use renewable energy and to make these technologies more understandable.
