

## Energy tour

### Energy resting places Slovenia – Ižakovci

Visit with us the southernmost energy resting place of that altogether 13 energy resting places along the Energy Road. 11 are situated in Austria, 1 in German and the 13<sup>th</sup> is in Slovenia.

At these places one thing is shown exemplarily, how energy can be generated from nature, without endangering thereby resources or the environment. The operators of these sites united to a working group (“ARGE Energy Road”). All together they want to emphasize interested people to use solar and water energy and to make these technologies more understandable.

---
