## Energy tour

### Energy resting places south east – Edelsbach, Kapfenstein

Visit with us the south-eastern energy resting place of that altogether 13 energy resting places along the Energy Road.

At these places one thing is shown exemplarily, how energy can be generated from nature, without endangering thereby resources or the environment. The operators of these sites united to a working group ("ARGE Energy Road"). All together they want to emphasize interested people to use biomass and solar energy and to make these technologies more understandable.

---
